NON-PERFORATED EMBOSSED CLAMPS

WIDE CROSS SADDLE

Wide cross saddle provides a more even support structure upon installation and longer term band tension.

**MEETS OR EXCEEDS
DIN 3017 STANDARD**

MATERIAL SPECIFICATIONS AND CLAMPING RANGES

Material specifications and clamping ranges are stamped on clamp band for easy identification and proper application fitment.

SMOOTH INSIDE BAND

Smooth inside band protects soft hoses against shearing and fray, extending service life.

WHICH CLAMP IS RIGHT FOR ME?

	Corrosion Resistance	Material Composition	Common Uses
W2	Average Requirements	430 Band & Housing Plated Carbon Steel Screw	Automotive - Truck Replacements - Industrial Applications
W3	Medium Requirements	All 430 Stainless Steel	Automotive OE - Industrial Applications
W4	High Requirements Low Magnetic Permeability	All 304 Stainless Steel	Critical Connections in Cars such as Petrol Pipes - Close to Electronic Circuits Agricultural Machinery - Motorbikes - Signs - General Outdoors - Stainless Steel Chimneys
